PROFESSIONAL SUMMARY

Motivated Bachelor of Information Technology student majoring in Cyber Security at RMIT University, with hands-on experience in cloud security, network administration, web application delivery, and technical support. Skilled in building secure, user-focused systems and seeking opportunities in cybersecurity, IT support, cloud, or network engineering.

EDUCATION

RMIT University, Melbourne | Bachelor of Information Technology

Major: Cyber Security | Expected graduation: September 2025

Nawaloka College of Higher Education, Colombo, Sri Lanka

Swinburne Foundation in Science & Engineering | 2021 - 2022

National Institute of Business Management (NIBM), Colombo, Sri Lanka

Certificate in Network Engineering (CCNE) | November 2021 - May 2022

CERTIFICATIONS

- Cisco Networking Academy - Networking Devices and Basic Configuration (October 2025)
- Cisco Networking Academy - Introduction to Cybersecurity (October 2025)

TECHNICAL SKILLS

Network Security	Firewalls, VPNs, IDS/IPS
Cloud & Platforms	AWS, Azure, DigitalOcean, Docker
Security Tools	Wireshark, Nmap, Metasploit
Programming & Scripting	Python, Bash, PowerShell, C++
Web Technologies	JavaScript, React, Firebase, Supabase, Next.js
Databases	MySQL, SQLite, Firestore, Supabase
Operating Systems	Windows, Linux, Kali Linux
Core Strengths	Troubleshooting, teamwork, problem-solving, analysis

PROJECTS AND EXPERIENCE

Stella Events System

Nenux Web Solutions / Client Project | 2026

- Built a modern event ticketing platform for the Italian market with secure online payments and a mobile-friendly experience.
- Integrated Stripe for checkout, automated digital ticket delivery, and QR-based event check-in.
- Improved the responsive layout, cleaner UI structure, and admin visibility with deployment-ready web tooling.

Car Service Management Web App

TW-Auto Tune, Dandenong | August 2025 - October 2025

- Built a full-stack system using React and Firebase for bookings, jobs, invoicing, and customer records.
- Implemented role-based access for admin, technician, and staff users using Firebase Authentication and protected routes.
- Designed dashboards for daily jobs, revenue trends, and service mix with a responsive desktop/mobile interface.

Restaurant Ordering Platform

Gami Gedara Sri Lankan Restaurant, Clayton | 2025

- Developed a Firebase-backed ordering platform for menu items and meal packs using React, Firestore, and Firebase Hosting.
- Built admin workflows for order review, status updates, and sales summaries with real-time data handling.
- Improved the checkout flow with validation, confirmations, and data views for fulfilment planning.

CI/CD Pipeline for Node.js Application

System Development and Operation Project | September 2024

- Built a CI/CD pipeline using GitHub Actions for a Node.js and MongoDB web application.
- Automated builds, unit testing, Jest coverage, and artifact generation for faster and more reliable delivery.

Secure DLT-Based Inventory Management and NFT Application

Blockchain Technology Project | October 2024

- Developed a secure distributed ledger-based inventory management system with digital signatures and consensus integration.
- Implemented multi-signature authentication and query verification and built a simple NFT management interface.

WordPress Site Development and Management

Millennium Imports Company, Dandenong South | August 2023

- Developed and managed WordPress websites to improve online presence, functionality, and performance.

GoDaddy Site Management

Lanka Foods, Glen Waverley (Paradise Isle) | October 2023

- Managed and maintained the company website on GoDaddy, applying updates, usability improvements, and analytics-driven changes.

IT Troubleshooting Officer

Integrated Development Consultants (Pvt) Ltd., Boraesgamuwa, Sri Lanka | September 2022 - January 2023

- Maintained and troubleshoot office computers and software, provided staff support, and applied preventive maintenance practices.

EXTRACURRICULAR ACTIVITIES

- RMIT Sri Lankan Association (RSLA) - Member (2024)
